

## Product Datasheet

### Goat Hamster IgG (heavy and light chains) antibody (orb22055)

**Description**

Precipitating polyclonal goat

immunoglobulins, heavy and light chains. Human...

**Species/Host**

Goat

**Conjugation**

Unconjugated

**Preservatives**

Delipidated, heat inactivated lyophilized stable whole serum No preservative added, as it may interfere with the antibody activity. No foreign protein added. Total protein and IgG concentration in the antiserum are comparable to those of pooled goat serum

**Form/Appearance**

Delipidated, heat inactivated lyophilized stable whole serum No preservative added, as it may interfere with the antibody activity. No foreign protein added. Total protein and IgG concentration in the antiserum are comparable to those of pooled goat serum

**Storage**

Storage: The lyophilized antiserum is shipped at ambient temperature and may be stored at +4°C; prolonged storage at or below -20°C. Working dilutions are prepared by adding sterile phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. Working dilutions should be stored at +4°C, not refrozen, and preferably used the same day. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the product

**Note**

For research use only

**Clonality**

Polyclonal

**Source**

Purified normal IgG isolated from pooled Syrian hamster serum. Freund's complete adjuvant is used in the first step of the immunization procedure.

**Hazard Information**

This product is intended FOR RESEARCH USE ONLY and FOR
