
Product Datasheet

**Goat IgG Mouse IgG1 IgG2A IgG2B IgG3 IgA IgM
(FITC) antibody (orb22068)**

Description

Fluorescein isothiocyanate-

polyclonal goat antiserum to
Mouse IgG, IgA an...

Species/Host

Goat

Conjugation

FITC

Preservatives

FITC-coupled purified
hyperimmune goat IgG lyophilized
from a solution in phosphate
buffered saline (PBS, pH 7.2). No
preservative added, as it may
interfere with the antibody
activity.

Form/Appearance

FITC-coupled purified
hyperimmune goat IgG lyophilized
from a solution in phosphate
buffered saline (PBS, pH 7.2). No
preservative added, as it may
interfere with the antibody
activity.

Storage

Storage: The lyophilized conjugate
is shipped at ambient temperature
and may be stored at +4°C;
prolonged storage at or below -
20°C. Spun down to remove
insoluble particles, divided into
small aliquots, frozen and stored
at or below -20°C. Prior to use, an
aliquot is thawed slowly in the
dark at ambient temperature,
spun down again and used to
prepare working dilutions by
adding sterile phosphate buffered
saline (PBS, pH 7.2). Repeated
thawing and freezing should be
avoided. Working dilutions should
be stored at +4°C, not refrozen,
and preferably used the same day.
If a slight precipitation occurs
upon storage, this should be
removed by centrifugation. It will
not affect the performance of the
immunoconjugate
