
Product Datasheet

**Goat IgG Mouse IgG1 IgG2A IgG2B IgG3 IgA IgM
(FITC) antibody (orb22085)**

Description

Fluorescein isothiocyanate-

polyclonal goat antiserum to
 Mouse IgG, IgA an...

Species/Host

Goat

Conjugation

FITC

Preservatives

FITC-coupled purified
 hyperimmune goat IgG lyophilized
 from a solution in phosphate
 buffered saline (PBS, pH 7.2). No
 preservative added, as it may
 interfere with the antibody
 activity.

Form/Appearance

FITC-coupled purified
 hyperimmune goat IgG lyophilized
 from a solution in phosphate
 buffered saline (PBS, pH 7.2). No
 preservative added, as it may
 interfere with the antibody
 activity.

Storage

Storage: The lyophilized conjugate
 is shipped at ambient temperature
 and may be stored at +4°C;
 prolonged storage at or below -
 20°C. Spun down to remove
 insoluble particles, divided into
 small aliquots, frozen and stored
 at or below -20°C. Prior to use, an
 aliquot is thawed slowly in the
 dark at ambient temperature,
 spun down again and used to
 prepare working dilutions by
 adding sterile phosphate buffered
 saline (PBS, pH 7.2). Repeated
 thawing and freezing should be
 avoided. Working dilutions should
 be stored at +4°C, not refrozen,
 and preferably used the same day.
 If a slight precipitation occurs
 upon storage, this should be
 removed by centrifugation. It will
 not affect the performance of the
 immunoconjugate
