
Product Datasheet

**Rabbit IgG Mouse IgG1 IgG2A IgG2B IgG3 IgA IgM
(FITC) antibody (orb22092)**

Description

Fluorescein isothiocyanate-

polyclonal rabbit antiserum to
Mouse IgG, IgA ...

Species/Host

Rabbit

Conjugation

FITC

Preservatives

FITC-coupled purified
hyperimmune rabbit IgG
lyophilized from a solution in
phosphate buffered saline (PBS,
pH 7.2). No preservative added,
as it may interfere with the
antibody activity.

Form/Appearance

FITC-coupled purified
hyperimmune rabbit IgG
lyophilized from a solution in
phosphate buffered saline (PBS,
pH 7.2). No preservative added,
as it may interfere with the
antibody activity.

Storage

Storage: The lyophilized conjugate
is shipped at ambient
temperature and may be stored at
+4°C; prolonged storage at or
below -20°C. Spun down to
remove insoluble particles,
divided into small aliquots, frozen
and stored at or below -20°C. Prior
to use, an aliquot is thawed slowly
in the dark at ambient
temperature, spun down again
and used to prepare working
dilutions by adding sterile
phosphate buffered saline (PBS,
pH 7.2). Repeated thawing and
freezing should be avoided.
Working dilutions should be stored
at +4°C, not refrozen, and
preferably used the same day. If a
slight precipitation occurs upon
storage, this should be removed
by centrifugation. It will not affect
the performance of the
immunoconjugate
