

Product Datasheet

**Rabbit IgG Mouse IgG1 IgG2A IgG2B IgG3 IgA IgM
(TRITC) antibody (orb22101)**

Description

Tetramethylrhodamine

fraction of polyclonal rabbit
antiserum to Mouse ...

Species/Host

Rabbit

Conjugation

TRITC

Preservatives

TRITC-coupled purified
hyperimmune rabbit IgG
lyophilized from a solution in
phosphate buffered saline (PBS, pH
7.2). No preservative added, as it
may interfere with the antibody
activity.

Form/Appearance

TRITC-coupled purified
hyperimmune rabbit IgG
lyophilized from a solution in
phosphate buffered saline (PBS, pH
7.2). No preservative added, as it
may interfere with the antibody
activity.

Storage

Storage: The lyophilized conjugate
is shipped at ambient temperature
and may be stored at +4°C;
prolonged storage at or below -
20°C. Spun down to remove
insoluble particles, divided into
small aliquots, frozen and stored at
or below -20°C. Prior to use, an
aliquot is thawed slowly in the dark
at ambient temperature, spun
down again and used to prepare
working dilutions by adding sterile
phosphate buffered saline (PBS, pH
7.2). Repeated thawing and
freezing should be avoided.
Working dilutions should be stored
at +4°C, not refrozen, and
preferably used the same day. If a
slight precipitation occurs upon
storage, this should be removed by
centrifugation. It will not affect the
performance of the
immunoconjugate
