

Product Datasheet

Goat anti Rabbit IgG IgA IgM (heavy and light chains) (orb22179)

Description	Precipitating polyclonal goat antiserum to rabbit immunoglobulins, IgG, IgA and IgM, heavy and light chains. In precipitating techniques as immunoelectrophoresis, single and double radial immuno- diffusion (Mancini, Ouchterlony) to identify and measure immunoglobulins; as secondary antibody to precipitate the immunoglobulin in normal rabbit serum. This antiserum is not intended for use in non-precipitating antibody-binding or other highly sensitive assays. For such uses labelled and unlabelled cytochemical and immunoassay grade reagents meeting the necessary additional specificity and performance requirements are available.
Species/Host	Goat
Conjugation	Unconjugated
Preservatives	Delipidated, heat inactivated lyophilized stable whole serum No preservative added Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added.
Form/Appearance	Delipidated, heat inactivated lyophilized stable whole serum No preservative added Total protein and IgG concentrations in the antiserum are comparable to those of pooled normal goat serum. No foreign proteins added.
Storage	Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.
Note	For research use only
Clonality	Polyclonal
Source	Purified normal IgG and fractions containing IgA, and IgM isolated from rabbit serum. Freund's complete adjuvant is used in the first step of the immunization procedure.
