Guinea pig Hemoglobin (HB) ELISA Kit (orb2667262)

Description Guinea pig Hemoglobin (HB) ELISA Kit

Range 1.56-100 μ g/mL

Note For research use only

Application notes standard: $100 \mu g/mL$. Test principle: The test principle applied in this kit is

Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Guinea pig HB. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Guinea pig HB. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Guinea pig

HB, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of $450 \text{nm} \pm 10 \text{nm}$. The concentration of Guinea pig HB in the

samples is then determined by comparing the OD of the samples to the standard

curve

Sample Types Serum, plasma, erythrocyte lysates.

Sensitivity 0.69 μg/mL

Expiration Date Please enquire.
