Mouse Mannose Associated Serine Protease 1 (MASP1) ELISA Kit (orb2667835)

Description Mouse Mannose Associated Serine Protease 1 (MASP1) ELISA Kit

Range 15.63-1000 ng/mL

Note For research use only

Application notes standard: 1000 ng/mL. Test principle: The test principle applied in this kit is

Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Mouse MASP1. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Mouse MASP1. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Mouse MASP1, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of

sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of $450 \text{nm} \pm 10 \text{nm}$. The concentration of Mouse MASP1 in the samples is then determined by comparing the OD of the samples to the standard

curve

Sample Types Serum, plasma and other biological fluids

Uniprot ID P98064

Sensitivity 6.7 ng/mL

Expiration Date Please enquire.
