Trypsin Inhibitor antibody (Peroxidase) (orb344908)

Description	Trypsin Inhibitor antibody (Peroxidase)	
Species/Host	Rabbit	
Reactivity	Plant	
Conjugation	HRP	Western Blot of Rabbit Anti Trypsin Inhi...
Tested Applications	ELISA, IHC, WB	
Immunogen	Anti-Trypsin Inhibitor was produced by repeated immunizations with soy bean trypsin inhibitor.	
Preservatives	0.01% (w/v) Gentamicin Sulfate. Do NOT add Sodium Azide!	
Form/Appearance	Liquid (sterile filtered)	Western Blot of Rabbit Anti Trypsin Inhi...
Concentration	1.0mg/mL	
Storage	Store vial at -20° C or below prior to opening. This vial contains a relatively low volume of reagent (25 µL). To minimize loss of volume dilute 1:10 by adding 225 µL of the buffer stated above directly to the vial. Recap, mix thoroughly and briefly centrifuge to collect the volume at the bottom of the vial. Use this intermediate dilution when calculating final dilutions as recommended below. Store the vial at -20°C or below after dilution. Avoid cycles of freezing and thawing.	
Note	For research use only	
Application notes	Anti-Trypsin Inhibitor peroxidase conjugated antibody has been tested by western blotting and ELISA and is suitable for IHC. Researchers should determine optimal titers for applications that are not stated below.	
Isotype	IgG	
Clonality	Polyclonal	
Purity	Anti-Trypsin Inhibitor antibody is an IgG fraction purified from monospecific antiserum by a multi-step process which includes delipidation, salt fractionation and ion exchange chromatography followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Peroxidase and anti-Rabbit Serum as well as purified and partially purified Trypsin Inhibitor (Soy Bean). Cross-reactivity against Trypsin Inhibitor from other tissues and species is unknown.
