

Product Datasheet

MIP 3 alpha antibody (orb345223)

Description

MIP 3 alpha antibody

Species/Host

Rabbit

Reactivity

Mouse, Rat

Conjugation

Unconjugated

Tested

ELISA, WB

Applications
Immunogen

This purified antibody was prepared from whole rabbit serum produced by repeated immunizations with full length recombinant mouse MIP-3 α protein.

Preservatives

None

Form/Appearance

Lyophilized

Concentration

1.0 mg/mL

Storage

Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Note

For research use only

Application notes

This purified antibody has been tested in western blotting. Reactivity is also expected in ELISA, neutralizations, radioimmunoassay and immunohistochemistry. The endotoxin content is estimated to be 10 pg/ μ L by the LAL method. By western blot a band approximately 10.7 kDa in size corresponding to native mouse MIP-3 α protein is expected in the appropriate cell lysate or extract. Specific conditions for reactivity should be optimized by the end user.

Isotype

IgG

Clonality

Polyclonal

Purity

This Protein A purified antibody was heated to 56°C for 30 minutes. In ELISA and other immunoreactive assays, this antibody will recognize both native and recombinant mouse MIP-3 α in cell supernatants and certain body fluids. A control of similarly diluted normal rabbit IgG is recommended.
