
Product Datasheet

IL-17F antibody (Biotin) (orb345234)

Evolution Biocomponents.
Description

IL-17F antibody (Biotin)

Species/Host	Rabbit
Reactivity	Mouse
Conjugation	Biotin
Tested Applications	DOT, ELISA, IHC, WB
Immunogen	This purified antibody was prepared from whole rabbit serum produced by repeated immunizations with full length recombinant mouse IL17-F protein.
Preservatives	0.01% (w/v) Sodium Azide
Form/Appearance	Lyophilized
Concentration	1.0 mg/mL
Storage	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Note	For research use only
Application notes	This purified antibody has been tested in dot blot and is suitable for use in ELISA and western blotting. By western blot a band approximately 17.9 kDa in size corresponding to mouse IL17-F protein is expected in the appropriate cell lysate or extract. Specific conditions for reactivity should be optimized by the end user.
Isotype	IgG
Clonality	Polyclonal
Purity	This purified antibody has been heated to 56°C for 30 minutes. In ELISA and other immunoreactive assays, this antibody will recognize both native and recombinant mouse IL17-F in cell supernatants and certain body fluids. A control of similarly diluted normal rabbit IgG is recommended.
Uniprot ID	Q7TNI7
