MIP-3 alpha antibody (Biotin)

<b>Description</b>	MIP-3 alpha antibody (Biotin)
<b>Species/Host</b>	Rabbit
<b>Reactivity</b>	Mouse, Rat
<b>Conjugation</b>	Biotin
<b>Tested Applications</b>	DOT, ELISA, IHC, WB
<b>Immunogen</b>	This purified antibody was prepared from whole rabbit serum produced by repeated immunizations with full length recombinant mouse MIP-3 $\alpha$ protein.
<b>Preservatives</b>	0.01% (w/v) Sodium Azide
<b>Form/Appearance</b>	Lyophilized
<b>Concentration</b>	1.0 mg/mL
<b>Storage</b>	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
<b>Note</b>	For research use only
<b>Application notes</b>	This purified antibody has been tested by dot blot and is suitable for use in ELISA and western blotting. By western blot a band approximately 10.7 kDa in size corresponding to mouse MIP-3 $\alpha$ protein is expected in the appropriate cell lysate or extract. Specific conditions for reactivity should be optimized by the end user.
<b>Isotype</b>	IgG
<b>Clonality</b>	Polyclonal
<b>Purity</b>	This Protein A purified antibody was heated to 56°C for 30 minutes. In ELISA and other immunoreactive assays, this antibody will recognize both native and recombinant mouse MIP-3 $\alpha$ in cell supernatants and certain body fluids. A control of similarly diluted normal rabbit IgG is recommended.
