RFA2 (phospho-S122) antibody (orb345426)

www.biorbyt.com

Description nts. RFA2 (phospho-S122) antibody

Species/Host Rabbit

Reactivity Yeast

Conjugation Unconjugated

Tested ELISA, IP, WB

Applications

Immunogen This affinity purified antibody was prepared from

whole rabbit serum produced by repeated

immunizations with a synthetic peptide corresponding to an internal region near aa 110-135 (of 273) of yeast DNA Replication Factor A (RFA2). The RFA complex consists of a heterotrimer of RFA1, RFA2 and RFA3, 69, 36 and 13 kda chains respectively. Yeast RFA2 is phosphorylated at the G1/S transition and is

dephosphorylated at mitosis.

Preservatives 0.01% (w/v) Sodium Azide

Form/Appearance Liquid (sterile filtered)

Concentration 0.54 mg/mL

Storage Store vial at -20° C prior to opening. Aliquot contents

and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to

immediate use.

Note For research use only

Application notes This affinity-purified antibody was tested for use in

western blotting against RFA2 containing cell lysates and by ELISA against the immunizing peptide. Reactivity in other immunoassays is unknown.

Isotype IgG

Clonality Polyclonal

Purity This affinity purified antibody is directed against yeast

RFA2. The product was affinity purified from monospecific antiserum by immunoaffinity

purification. Antiserum was first purified against the phosphorylated form of the immunizing peptide. The resultant affinity purified antibody was then crossadsorbed against the non-phosphorylated form of the immunizing peptide. This phospho specific polyclonal antibody is specific for phosphorylated pS122 of yeast REA2. Reactivity with non-phosphorylated yeast REA2.
