p90 RSK1 (phospho-S732) antibody

Species/Host Rabbit

Reactivity Human

**Conjugation** Unconjugated

**Tested** ELISA, WB

**Applications** 

Immunogen This affinity purified antibody was prepared from

whole rabbit serum produced by repeated immunizations with a synthetic peptide

corresponding to a region near the C-terminal end of

human RSK1 protein.

**Preservatives** 0.01% (w/v) Sodium Azide

Form/Appearance Liquid (sterile filtered)

Concentration 1.0mg/mL

**Storage** Store vial at -20° C prior to opening. Aliquot contents

and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior

to immediate use.

**Note** For research use only

**Application notes** This affinity-purified antibody has been tested for

use in ELISA and western blotting. Specific conditions for reactivity should be optimized by the end user. By western blot a band approximately 90 kDa in size corresponding to p90 RSK1 pS732 protein is

corresponding to p90 RSK1 pS732 protein is expected in the appropriate cell lysate or extract.

**Isotype** IgG

**Clonality** Polyclonal

**Purity** This product was affinity purified from monospecific

antiserum by immunoaffinity chromatography using phosphorylated peptide coupled to agarose beads followed by solid phase adsorption against non phosphorylated peptide. This antibody is specific for human p90 RSK1 protein phosphorylated at S732. A BLAST analysis was used to suggest cross reactivity with p90 RSK1 from human, rat, mouse, horse, bovine, and dog based on 100% homology with the immunizing sequence. Partially cross reactivity may occur against opossum and chicken based on > 90%

homology with the immunizing sequence. Cross
