and is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial

platforms.

Isotype IgG Fab

Purity This product was prepared from normal serum by delipidation, salt fractionation

and ion change chromatography followed by papain digestion and extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Fluorescein, anti-Goat IgG, anti-Goat IgG F(ab')2 and anti-Goat Serum. No reaction was observed against anti-

Goat IgG F(c) or anti-Papain.
