
Product Datasheet

Golden Syrian Hamster IgG (H&L) antibody (Biotin) (orb347127)

Description

Golden Syrian Hamster IgG (H&L) antibody

Species/Host

Rabbit

Reactivity

Golden Hamster

Conjugation

Biotin

Tested Applications

ELISA, IHC, WB

Immunogen

Hamster IgG whole molecule

Preservatives

0.01% (w/v) Sodium Azide

Form/Appearance

Lyophilized

Concentration

1.5 mg/mL

Storage

Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

Note

For research use only

Application notes

Anti-Golden Syrian Hamster IgG Biotin Conjugation has been tested by ELISA and is assayed against 1.0 ug of Hamster IgG in a standard capture ELISA using Peroxidase Conjugated Streptavidin #S000-03 and ABTS (2,2'-azino-bis-[3-ethylbenthiazoline-6-sulfonic acid]) code # ABTS-100 as a substrate for 30 minutes at room temperature. A working dilution of 1:15,000 to 1:60,000 of the reconstitution concentration is suggested for Anti-Golden Syrian Hamster IgG.

Isotype

IgG

Clonality

Polyclonal

Purity

Anti-Golden Syrian Hamster IgG Antibody was prepared from monospecific antiserum by immunoaffinity chromatography using Hamster IgG coupled to agarose. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-biotin, anti-Rabbit Serum, Hamster IgG and Hamster Serum.

Dilution Range

ELISA: 1:20,000 - 1:100,000, IHC: 1:1,000 -
