
Product Datasheet

CD4 antibody (orb348872)

Description

Human monoclonal antibody to CD4

Species/Host

Human

Reactivity

Human, Monkey

Conjugation

Unconjugated

Tested Applications

Blocking, ELISA, FC, IHC

Immunogen

Domain 1 of human CD4.

Target

CD4

Preservatives

PBS with 0.02% Proclin 300.

Concentration

1 mg/ml

Storage

Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Note

For research use only

Application notes

The antibody binds specifically to CD4, a molecule which is part of the immunoglobulin super-family, expressed on the surface of helper T cells. The CD4 molecule acts as a co-receptor in the activation of T cells, aiding the interaction between the TCR and MHC II of the antigen-presenting cell. The antibody is classified as "primatized", as the variable regions of the light and heavy chains are obtained from primates, while the lamda light chain and γ 4 heavy chain constant domains are human. The antibody was engineered from the primatized IgG1 monoclonal antibody Keliximab by substituting two key residues. The role of the antibody as an immunosuppressor has been tested in vivo, by intravenous administration in chimpanzees and human volunteers. The antibody reached Phase II clinical trials with Biogen-Idec.

Isotype

IgG4

Clonality

Monoclonal

Purity

Purified

Uniprot ID
P01730
Expiration Date

12 months from date of receipt.
