

Product Datasheet

Human TNFA protein (Active) (orb359194)

Description Recombinant human TNFA active protein

Endotoxins Less than 1.0 EU/μg as determined by LAL method.

Preservatives Lyophilized from a 0.2 μm filtered 20 mM PB, 10 mM Nacl, pH 7.0

Form/Appearance Lyophilized powder

Storage The shelf life is related to many factors, storage state, buffer ingredients,

storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is

12 months at -20°C/-80°C.

Tag Tag-Free

Note For research use only

Application notes We recommend that this vial be briefly centrifuged prior to opening to bring the

contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL.We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final

concentration of glycerol is 50%. Customers could use it as reference.

Protein Sequence M+VRSSSRTPSDKPVAHVVANPQAEGQLQWLNRRANALLANGVELRDNQLVVPSEGLYLI

GVFQLEKGDRLSAEINRPDYLDFAESGQVYFGIIAL

Biologically Active? Yes

Biological Activity Fully biologically active when compared to standard. The ED50 as determined by

a cytotoxicity assay using murine L929 cells is less than 0.05 ng/ml,

corresponding to a specific activity of $\mathbin{\ensuremath{\square}}\, 2.0\,\times\, 107$ IU/mg in the presence of

actinomycin D.

Purity > 98% as determined by SDS-PAGE and HPLC.
