

Product Datasheet

Human IFN gamma protein (Active) (orb359214)

Description Human Interferon gamma protein (Active)

Endotoxins Less than 1.0 EU/μg as determined by LAL method.

Preservatives Lyophilized from a 0.2 μm filtered PBS, pH 7.4

Form/Appearance Lyophilized powder

Storage The shelf life is related to many factors, storage state, buffer ingredients,

storage temperature and the stability of the protein itself. Generally, the shelf life of liquid form is 6 months at -20°C/-80°C. The shelf life of lyophilized form is

12 months at -20°C/-80°C.

Tag Tag-Free

Note For research use only

Application notesWe recommend that this vial be briefly centrifuged prior to opening to bring the

contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL.We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final

concentration of glycerol is 50%. Customers could use it as reference.

AAKTGKRKRSOMLFRGRRASO

Biologically Active? Yes

Biological Activity Fully biologically active when compared to standard. The ED50 as measured in

anti-viral assays using human HeLa cells infected with encephalomyocarditis

(EMC) virus is 0.15-0.80 ng/ml.

Purity > 98% as determined by SDS-PAGE and HPLC.
