## Product Datasheet

### Mouse IgG1 Isotype Control antibody (orb43527)

**Description**

Mouse IgG1 Isotype Control

**Conjugation**

FITC

**Tested**

FC

**Applications**
**Preservatives**

Phosphate buffered saline (PBS), pH 7.4, 15 mM sodium azide

**Concentration**

1 mg/ml

**Storage**

Store at 2-8°C. Protect from prolonged exposure to light. Do not freeze.

**Note**

For research use only

**Application notes**

Negative control: The reagent is intended as an isotype control to establish the amount of non-specific antibody binding. For your particular experiment, use the same concentration of this control antibody as the recommended working concentration of the antigen-specific antibody. Also, when working with prediluted antibodies, dilute the isotype control to the same concentration as is the concentration of the antigen-specific antibody in the prediluted antibody solution you are using. If under particular experimental conditions the background signal of the isotype control is too high (usually when working concentrations of used antibodies are above 10 µg/ml of incubation mixture), change the conditions of your experiment to reduce the background.

**Isotype**

Mouse IgG1 kappa

**Clonality**

Monoclonal

**Purity**

Purified antibody is conjugated with fluorescein isothiocyanate (FITC) under optimum conditions and unconjugated antibody and free fluorochrome are removed by size-exclusion chromatography.

**Dilution Range**

FACS: 10 µg/ml

**Expiration Date**

12 months from date of receipt.

Example of nonspecific mouse IgG1 (MOPC-...
