
Product Datasheet

Goat anti-Rabbit IgG (H&L), HRP conjugated - trial sample (orb699943)

Description

Goat anti-Rabbit IgG (H&L), HRP

Species/Host

Goat

Reactivity

Rabbit

Conjugation

HRP

Tested Applications

ELISA, IHC, WB

Immunogen

Purified Rabbit IgG, whole molecule,

Form/Appearance

Lyophilized

Storage

Store lyophilized material at 2-8°C. For long time storage after reconstitution, dilute the antibody solution with glycerol to a final concentration of 50% glycerol and store as liquid at -20°C, to prevent loss of enzymatic activity. For example, if you have reconstituted 1 mg of antibody in 1,1 ml of sterile water add 1,1 ml of glycerol. Such solution will not freeze in -20°C. If you are using a 1:5000 dilution prior to diluting with glycerol, then you would need to use a 1:2500 dilution after adding glycerol. Prepare working dilution prior to use and then discard, Be sure to mix well but without foaming.

Note

For research use only

Application notes

Concentration: 1.0 mg/ml. Antibody is provided in: 10 mM Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2, 1% BSA (w/v), Protease IgG free, 0.1 % (v/v) ProClin 150. Affinity purified antibody is > 95% pure, according to SDS-PAGE. This antibody can be used on a very wide range of samples from various species including many model plants, algae, diatoms and bacteria.

Clonality

Polyclonal

Purity

Immunogen affinity purified using
