
Product Datasheet

**Goat anti-Guinea pig IgG (H&L) antibody (TRITC)
(orb700115)**

Description

Goat polyclonal antibody against Goat

TRITC

Species/Host

Goat

Conjugation

TRITC

Form/Appearance

Lyophilized

Storage

Store lyophilized material at 2-8°C. For long time storage after reconstitution, dilute the antibody solution with glycerol to a final concentration of 50% glycerol and store as liquid at -20°C, to prevent loss of enzymatic activity. For example, if you have reconstituted 1 mg of antibody in 1,1 ml of sterile water add 1,1 ml of glycerol. Such solution will not freeze in -20°C. If you are using a 1:5000 dilution prior to diluting with glycerol, then you would need to use a 1:2500 dilution after adding glycerol. Prepare working dilution prior to use and then discard, Be sure to mix well but without foaming.

Note

For research use only

Application notes

This antibody reacts with the heavy chains on guinea pig IgG and with the light chains on all guinea pig immunoglobulins based on immunoelectrophoresis. Minimum cross-reactivity is observed to non-immunoglobulin guinea pig serum proteins based on immunoelectrophoresis. Antibody is supplied in 10 mM sodium phosphate, 150 mM sodium chloride, pH 7.2, 1% (w/v) BSA, protease/IgG free and 0.05 % (w/v) sodium azide as preservative.

Clonality

Polyclonal

Purity

Immunogen affinity purified IgG.

Dilution Range

The optimal working dilution should be determined by the investigator,

Expiration Date

12 months from date of receipt.
