## Product Datasheet

**Goat anti-Rabbit IgG (H&L) antibody (HRP)  
(orb700366)**

**Description**

Goat polyclonal antibody against Goat

<b>Species/Host</b>	Goat
<b>Reactivity</b>	Rabbit
<b>Conjugation</b>	HRP
<b>Tested Applications</b>	ELISA, IHC, WB
<b>Immunogen</b>	Purified Rabbit IgG (H&L)
<b>Form/Appearance</b>	Lyophilized
<b>Storage</b>	Store lyophilized material at 2-8°C. For long time storage after reconstitution, dilute the antibody solution with glycerol to a final concentration of 50% glycerol and store as liquid at -20°C, to prevent loss of enzymatic activity. For example, if you have reconstituted 0.5 mg of antibody in 0.55 ml of sterile water add 0.55 ml of glycerol. Such solution will not freeze in -20°C. If you are using a 1:5000 dilution prior to diluting with glycerol, then you would need to use a 1:2500 dilution after adding glycerol. Prepare working dilution prior to use and then discard. Be sure to mix well but without foaming.
<b>Note</b>	For research use only
<b>Application notes</b>	This antibody reacts with the heavy chains on rabbit IgG and with the light chains on all rabbit immunoglobulins based on immunoelectrophoresis. No reactivity is observed to non-immunoglobulin rabbit serum proteins based on immunoelectrophoresis.
<b>Clonality</b>	Polyclonal
<b>Purity</b>	Immunogen affinity purified goat IgG, F(ab)' <sub>2</sub> fragment.
<b>Dilution Range</b>	The optimal working dilution should be determined by the investigator
<b>Expiration Date</b>	12 months from date of receipt.
