Immunogen

An N-terminus fragment (D5) and recombinant human protein (MITF/915) were used as the immunogen for the MITF antibody cocktail.

Preservatives

0.2 mg/ml in 1X PBS with 0.1 mg/ml rAlbumin (US sourced) and 0.05% sodium azide

Storage

Store the MITF antibody cocktail at 2-8°C (with azide) or aliquot and store at -20°C or colder (without azide).

For research use only

Application notes

Optimal dilution of the MITF antibody cocktail should be determined by the researcher.1. Staining of formalin-fixed tissues requires boiling tissue sections in pH 9 10mM Tris with 1mM EDTA for 10-20 min followed by cooling at RT for 20 minutes2. The prediluted format is supplied in a dropper bottle and is optimized for use in IHC. After epitope retrieval step (if required), drip mAb solution onto the tissue section and incubate at RT for 30 min.
