

## Product Datasheet

### Porcine TRY ELISA Kit (orb779794)

<b>Description</b>	The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Trypsin(TRY).
<b>Reactivity</b>	Porcine
<b>Range</b>	1.57-100 ng/mL
<b>Tested Applications</b>	ELISA
<b>Concentration</b>	100 ng/mL
<b>Note</b>	For research use only
<b>Application notes</b>	standard: 100 ng/mL. Test principle: The test principle applied in this kit is Sandwich enzyme immunoassay. The microtiter plate provided in this kit has been pre-coated with an antibody specific to Pig TRY. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Pig TRY. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added, only those wells that contain Pig TRY, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Pig TRY in the samples is then determined by comparing the OD of the samples to the standard curve
<b>Sample Types</b>	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
<b>Uniprot ID</b>	<b>P00761</b>
<b>Sensitivity</b>	0.64 ng/mL
<b>Expiration Date</b>	Please enquire.
