

Product Datasheet

Other ABA ELISA Kit (orb781679)

Description	This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Abscisic Acid(ABA) protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Abscisic Acid(ABA).
Reactivity	All
Range	1.57-100 ng/mL
Tested Applications	ELISA
Concentration	100 ng/mL
Note	For research use only
Application notes	standard: 100 ng/mL. Test principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with ABA protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to ABA. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm \pm 10nm. The concentration of ABA in the samples is then determined by comparing the OD of the samples to the standard curve
Sample Types	tissue or cell culture supernates
Sensitivity	0.53 ng/mL
Expiration Date	Please enquire.
