### Porcine ASD ELISA Kit (orb782501)

<b>Description</b>	This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate pro...
<b>Reactivity</b>	Porcine
<b>Range</b>	156.25-10000 pg/mL
<b>Tested Applications</b>	ELISA
<b>Concentration</b>	10000 pg/mL
<b>Note</b>	For research use only
<b>Application notes</b>	Standard: 10000 pg/mL. Test Principle: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with Pig ASD protein. Standards or samples are added to the appropriate microtiter plate wells then with a biotin-conjugated antibody specific to Pig ASD. Next, Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. After TMB substrate solution is added. The enzyme-substrate reaction is terminated by the addition of sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450nm ± 10nm. The concentration of Pig ASD in the samples is then determined by comparing the OD of the samples to the standard curve
<b>Sample Types</b>	serum, plasma, tissue homogenates, cell lysates, cell culture supernates and other biological fluids
<b>Sensitivity</b>	48.8 pg/mL
<b>Expiration Date</b>	Please enquire.
